

Technical Data Sheet

Reagent: anti-CD38-R-Phycoerythrin

Antibody: OKT10

Lot: 2029-33

Species: Mouse

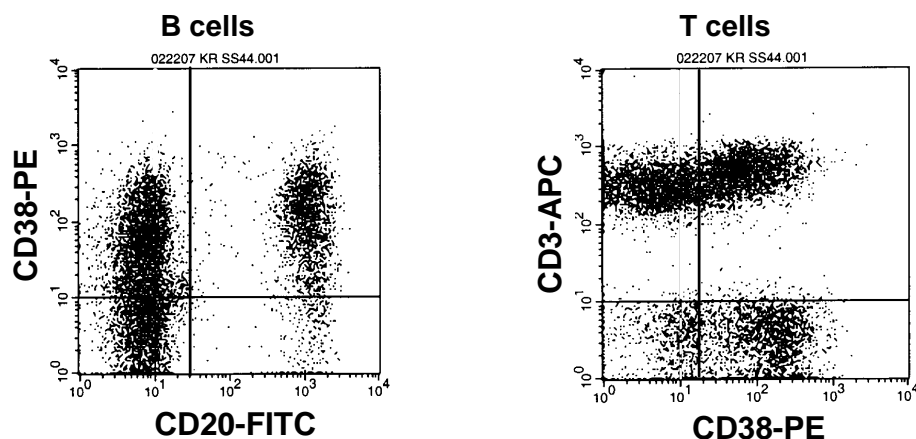

Isotype: IgG1

Unit size: 100 tests

Description: OKT10 recognizes CD38 on human lymphocytes and cross reacts with rhesus macaque. The molecule targeted by this antibody on macaque cells has not been characterized. The staining pattern of this antibody on macaque lymphocytes differs somewhat from that seen on human lymphocytes.

Directions for use: 20 ng/test (5 ul antibody per 100µl of whole blood).
approximate working concentration

Typical staining of rhesus macaque whole blood:

For Research Use Only- All reagents are to be used in accordance with the terms of the Resource registration agreement.
